

V8b Test Results

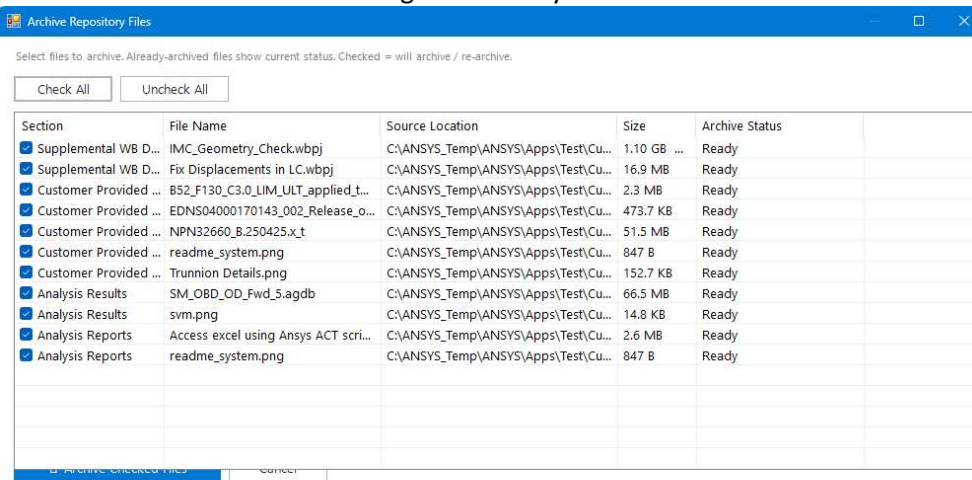

Thursday, June 11, 2026 11:32 AM

V8b Test Results:

- ✓ **Note 3/4 — Remove with archive cleanup** Remove an archived file. Should prompt: "Also delete the archived copy from the repository? Yes/No". Try both answers — Yes should delete the physical file from the section folder, No should leave it. -->Works.
- ! **Test 4/6 — Owner open source option** Open a ZIP-archived .wbpj that has already been extracted. The ZipOpenDialog should now show "Open original source file" as the first option (only if the source path exists on this machine). -->see note 3 below.
- ✓ **Note 5 — Copy + _files results exclusion** In the Archive dialog with "Copy .wbpj + _files" selected, the "Include result files" checkbox should now apply to copy operations too. works.
- ! **Note 8 — Orphaned files in Health Check** After the rename/relink scenario (svm1.png → svm.png), run Health Check. The "Orphaned Archive Files" section should list svm1.png from the archive folder. Click Delete to remove it from disk. -->When I renamed the source file svm1.png to svm.png, the status never changed in the hub view and it never noticed a difference except Size and Modified columns went blank for that entry. Again, it seems once a file is archived, the hub view only shows the status and information of the archived file, not the reference files, and the manifest no longer has a line for "source_path".

V8b Notes:

1. Expanding archive dialog works, but the "Workbench Project Archive Method" and buttons don't move with the window and get hidden by the datatable:

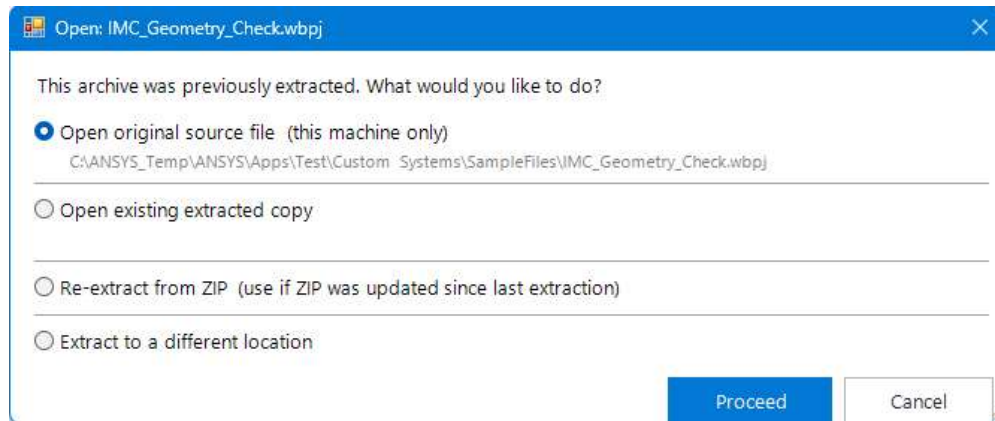

Section	File Name	Source Location	Size	Archive Status
✓ Supplemental WB D...	IMC_Geometry_Check.wbpj	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	1.10 GB ...	Ready
✓ Supplemental WB D...	Fix Displacements in LC.wbpj	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	16.9 MB	Ready
✓ Customer Provided ...	B52_F130_C3.0_LIM_ULT_applied_t...	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	2.3 MB	Ready
✓ Customer Provided ...	EDNS04000170143_002_Release_o...	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	473.7 KB	Ready
✓ Customer Provided ...	NPN32660_B.250425.x_t	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	51.5 MB	Ready

✓ Customer Provided ...	Trunnion Details.png	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	152.7 KB	Ready
✓ Analysis Results	SM_OBD_OD_Fwd_5.agdb	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	66.5 MB	Ready
✓ Analysis Results	svm.png	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	14.8 KB	Ready
✓ Analysis Reports	Access excel using Ansys ACT scri...	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	2.6 MB	Ready
✓ Analysis Reports	readme_system.png	C:\ANSYS_Temp\ANSYS\Apps\Test\Cu...	847 B	Ready

2. Health check should also include an option to relist orphan files to the associated Hub section. Those files would get archived status.
3. Indexing is messed up for the Supplemental database table. I archived two different databases:

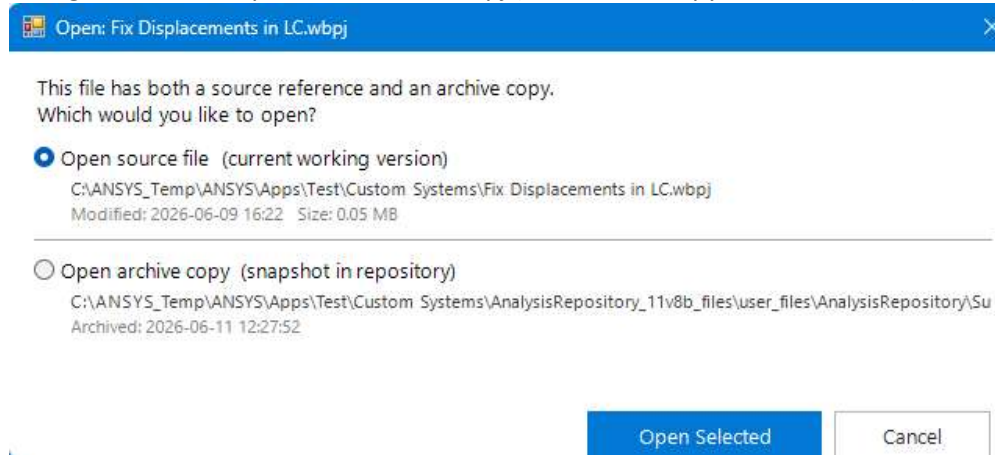

- i. Fix Displacement in LC.wbpj (archived as copy with result files)
- ii. IMC_Geometry_Check.wbpj (archived as zip without results files)

When I select to open Fix Displacement in LC.wbpj, I get the Open dialog for the IMC_Geometry_Check.wbpj:

The inverse happens when I select to open the IMC_Geometry_Check.wbpj. I get the Open dialog for the Fix Displacements in LC.wbpj (archived as copy with result files)

Also, the open dialog for a zip archive that hasn't been extracted should only list Open original source or extract to repository or extract to location. Open existing extracted copy is irrelevant.

4. Still need to test things on a different machine, but let's iron these issues out first.
